

LÍNGUA INGLESA – QUESTÕES DE 21 A 22

Leia atentamente o infográfico, abaixo, e responda às questões 21 e 22.

HOW A BOTTLE IS RECYCLED

GOOD JOB! You tossed that plastic bottle into the recycling bin rather than straight into the trash. But do you know what will happen to that bottle now?

KIDS DISCOVER

COLLECTION

1 Bottles and other recyclable materials are picked up from homes, schools, and businesses and taken to a recycling facility.

SORTING

2 Bottles and containers are sorted based on what they're made of and sometimes what color they are. The items then go through a machine that shreds them.

MELTING

3 The shreds are washed to remove any impurities, pieces of labels or leftover contents. They are then dried and melted.

FLAKING

4 The melted plastic is processed into flakes, which can be made into a wide variety of plastic products.

NEXT APPLICATIONS

5 The flakes can be spun into a very fine, threadlike material in a process similar to how cotton candy is made. Companies use those "threads" to make a wide variety of items, including carpets, clothing, or filling for jackets and quilts. Depending on the type of plastic, they can also be made into new (well, sort of new!) plastic bottles.

4.43 pounds Amount of trash the average person produces in a single day

34.1% Percentage of trash that's recycled

21. O infográfico tem como principal objetivo:

- a) explicar como as garrafas plásticas são recicladas.
- b) mostrar as etapas de fabricação do plástico.
- c) apresentar produtos feitos com plástico reciclado.
- d) explicar a razão pela qual as garrafas devem ser recicladas.

22. Em relação às informações apresentadas no texto, é CORRETO afirmar:

- a) Na etapa 1, os consumidores levam as garrafas vazias até o local de reciclagem.
- b) Na etapa 3, os resíduos são retirados das garrafas e o plástico é derretido.
- c) Na etapa 2, as garrafas são selecionadas por cor e tipo de material e depois lavadas.
- d) Na etapa 5, a produção dos flocos é semelhante à produção do algodão doce.
